Overview

Blockchain technology is, unarguably, the single most exciting

innovation with enormous implications for revolutionizing products and services, comparable to the

invention of the Internet

Ever since the introduction of blockchain technology, They have been enormous changes and sustainable improvements which has Been recorded.

More so, the crypto industry has moved from only creating contract and trading of assets to a more globalised and substantial era where every asset put on the market has a specific use case or cases – this use cases are the fundamental determinant of the future of such asset.

It's a fact that the blockchain advancement have had a very noticeable effect in almost all walks of life and in every major sector. One of the immediate candidates for disruption by this technological advancement is the Financial Services industry, which, up to very recently, has been unhealthily rigid

The most recent and the new hotspot for blockchain explosion is the Art and entertainment industry through the introduction of the Web3.0.

INTRODUCTION

TORRES is a utility token for the web3 ecosystem. Torres is currently built on Polygon network (MATIC) with the vision of cross-chain development into ERC20 V2.0 and multiple other chains.

TORRES has a total supply of 140,000,000 tokens with an entirely decentralized ecosystem, even the team has no access to the tokens.

Vision of the TORRES team is not limited to investing in top NFT platforms and artworks, incubating leading NFT artists to build a bridge between world-class artists and the NFT world; sponsoring galleries, organizing art exhibitions or publications, and setting up awards to support art creation and criticism; establishing art collections.

Furthermore, TORRES would introduce a new use case in the blockchain industry which will bring advancement blockchain powered Fintech as never seen before.

Decentraland's value proposition to application developers is that they can fully capitalize on the economic interactions between their applications and users. To allow

those economic interactions, the platform must allow three things to be traded:

currency, goods, and services.

TORRES will integrate a core system that allows global, instant, and cost-effective payments between any two users on the internet. Cryptocurrencies allow for trustless

payment channels to be established between parties, with low-trust hub-and-spoke systems already possible.

Torres Token

WHY TORRES?
